Word from the Founding Organisers

Dear Colleagues and Friends,

We are pleased to announce the 14th edition of the Belgian Heart Rhythm Meeting, "Arrhythmias for every Cardiologist", which will be organised on Thursday 22nd and Friday 23rd October 2020.

This year is full of uncertainties and, more than ever, it is important to bring together together healthcare professionals working in the field of cardiology to exchange exchange and share experiences and research results on all aspects of clinical rhythmology.

The COVID-19 pandemic has forced the whole planet to implement many changes in our daily lives and activities. The Belgian Heart Rhythm Meeting is adapting to the situation, following security measures set by the authorities and working for the best interests of all.

We are therefore thrilled to announce that the BHRM has become a **Hybrid congress!** We will give the possibility to attend the congress on site and/or to participate remotely, providing the same quality as we are used to in both formats.

The scientific programme, presented by distinguished speakers, will focus on daily management of cardiac arrhythmias, including socio-economic and radioprotection sessions, moderated poster sessions and ECG courses.

Rhythmology did not stop with the Pandemic! So let's continue, by maintaining the highest standards, proposing a scientific event worth attending, both physically and digitally!

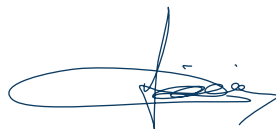

Mark your calendar and join us to the 14th Belgian Heart Rhythm Meeting.
